Deltek Vision Meets Microsoft Project

Vision Project Connect enables key information to flow back and forth between a Microsoft Project Plan and Vision. With Vision Project Connect, it doesn't matter which tool your firm uses to manage a specific project. Whether you manage one or all of your plans in Microsoft Project, superior firm-wide resource management output and processes can be conducted with Vision Project Connect / Vision Resource Planning.

Deltek Consulting offers standard services packages to assist you to install and configure Vision Project Connect to enable you to quickly achieve a return on investment by optimizing the utilization and management of your resources. The services packages also include training for your Vision administrator and project managers in the use of Vision Project Connect as well as advice and guidance on project management best practices.

SERVICE PACKAGES

STANDARD PACKAGE

Vision Project Connect installation and configuration packages are tailored to the scale of your business operations and project teams.

All customers receive the following services:

INSTALLATION:

Vision Project Connect is installed by a Deltek Consulting product specialist who first checks that you have a server configuration that is compliant with installation pre-requisites. The software is then configured to interface with an instance of Vision and either Microsoft Project Server 2007 or an instance of a Microsoft Resource Pool file from Vision.

USER INTERFACE CONFIGURATION:

The Vision Project Connect user interface can optionally be launched and managed from the Vision dashboard plus a set of icons are added as plugins to your Microsoft Project environment to facilitate the use of the integration interface.

Deltek (NASDAQ: PROJ) is the leading provider of enterprise applications software designed specifically for project-focused businesses. For more than two decades, our software applications have enabled organizations to automate mission-critical business processes around the engagement, execution and delivery of projects. More than 12,000 customers worldwide rely on Deltek to measure business results, optimize performance, streamline operations and win new business.

ON-DEMAND TRAINING:

Your services package includes access to a self-paced online class on the basic function of Vision Project Connect which is accessed through the Deltek Consulting support portal.

INSTRUCTOR LED TRAINING:

Dependent on the scale of your operations you will receive either one or two instances of instructor led training courses. One course is designed to provide the person responsible for administering the interface the guidance that they will need to start and stop the interface, manage user profiles and maintain log files. The other is for users who will receive instructions on Vision and Microsoft Project process flows.

ENTERPRISE PACKAGE

For Enterprise scale customers, in addition to the services included in the Standard package, you will receive the following:

1. A Deltek Consulting resource management specialist will review your existing project management/resource management practices and advise where such practices need to be aligned with the Vision Project Connect interface dataflows.
2. The consultant will review with you your Vision deployment strategy along with current interface requirements and provide recommendations on hardware sizing and software deployment.

REMOTE AND ON SITE SERVICE DELIVERY

The standard package is delivered remotely using web conferencing and stand phone support. As an additional cost option elements of the Enterprise Package can be delivered at the site of your choosing.
