- **Support for the Latest Microsoft SharePoint and Office Releases**
- **Usability Enhancements**

DELTEK VISION 5.1—OVERVIEW OF NEW FEATURES

Deltek Vision brings all critical business processes together for the successful operation of the project-focused professional services firm. It encourages knowledge sharing among groups, eliminates separate silos of information and provides a uniquely comprehensive view of firm-wide operations. Deltek Vision, can help you improve business performance, streamline operations and win new business.

The latest version of Deltek Vision provides critical features that address important new challenges facing today's project-focused firms.

NEW REPORTING AND ANALYSIS CAPABILITIES

Deltek Vision 5.1 further empowers executives and managers by providing a new way to analyze information using Microsoft® SQL Server™ 2005 Analysis Services and Microsoft® Excel. This new capability enables pre-configured Vision data to be accessed through Microsoft Excel for viewing and interactive analysis. This data can be quickly and easily analyzed in many different ways, replacing the need to prepare and compare multiple reports from Vision. With this new capability, you can:

- Analyze project, labor, expense, employee, vendor, general ledger and other Vision data over fiscal periods, years, quarters, calendar months and even days

- Use Excel to analyze and format Vision data, including graphs and charts
- Analyze trends using full transaction backup and drill-down screens

Vision 5.1 also includes other reporting enhancements to improve the available options and content of certain reports.

ENHANCED MOBILE APPLICATIONS SUPPORT

Deltek Vision CRM information can now be accessed from hand-held devices (requires Windows Mobile OS). This means that personnel driving new business and customer-related activity will have access to critical business information through their mobile device. With Vision 5.1 you can:

- Access Vision client, contact opportunity and activity information with a hand-held device
- Add, edit or delete Vision customers, contacts, opportunities and activities using a hand-held device when not connected to Vision and synchronize at a later time
- Synchronize information from a hand-held device with the Vision database at any time, using a secure connection
- Trigger Vision workflows from data entered on a hand-held device and then synchronized to Vision

Deltek (NASDAQ: PROJ) is the leading provider of enterprise applications software designed specifically for project-focused businesses. For more than two decades, our software applications have enabled organizations to automate mission-critical business processes around the engagement, execution and delivery of projects. More than 12,000 customers worldwide rely on Deltek to measure business results, optimize performance, streamline operations and win new business.

SUPPORT FOR CYBER RECRUITER

Effective recruiting is a significant challenge for today's professional services firms as tight labor markets make it increasingly difficult to fill open positions. Deltek Vision 5.1 helps to meet this challenge by providing integration with Cyber Recruiter™, a web-based human resources software solution. Supporting the complete recruiting and hiring lifecycle, new hires generated from Cyber Recruiter can be automatically integrated into Vision thus reducing redundant data entry and streamlining the hiring process. The integration transfers basic information, skills, education and other resume information into the Vision system. New fields in Cyber Recruiter further reduce the need to re-key data into Vision. These include the employee's pay rates, bill rates and organization.

INTERNATIONAL SUPPORT

Deltek Vision 5.1 provides a link to the Canadian version of Ceridian® affording our Canadian customers a new payroll processing option.

Additional flexibility in the Vision General Ledger facilitates the management of local and global chart of accounts and multi-GAAP reporting.

ENHANCED BILLING

Deltek Vision 5.1 provides a new Milestone billing option enabling customers to specify the dollar amount or the percent of contract value that will be billed on specified future dates. Thereafter, invoices can be printed for all scheduled billings falling within a specified date range.

Vision 5.1 also provides new features that make it easy to assign Unit expenses, saving considerable time on projects that are field day or equipment intensive.

ACCOUNTING ENHANCEMENTS

A number of new features have been added to Deltek Vision Accounting, including:

- Additional flexibility in the Deltek General Ledger to enable better financial and compliance reporting for different companies and countries
- Enhanced checkbook reconciliation
- New payroll features to allow net-to-gross calculations for bonuses

SUPPORT FOR THE LATEST MICROSOFT SHAREPOINT AND OFFICE RELEASES

Deltek Vision 5.1 provides support for the Microsoft® Office™ SharePoint 2007 platform, including SharePoint Services (WSS) and Microsoft Office SharePoint Server (MOSS). This is an important enhancement that will allow customers using Vision's Document Management module to migrate to the new SharePoint environment.

Vision 5.1 also provides support for Microsoft Office 2007, so that customers using Vision Proposals and merge capabilities can now utilize the many new features of Office 2007 in preparing professional quality, winning proposal documents.

USABILITY ENHANCEMENTS

New filter options are provided in Deltek Vision 5.1 for project templates, billing rate tables and account groups so the user only sees the tables applicable to the work that he/she performs. This results in greater efficiency by allowing users to get to the information they need more quickly.

Vision 5.1 also allows the user to designate a Unit status, saving time and preserving unit posting history when the status is changed.
